Graphing Quadratics in Standard Form

Section I. Sketch each equation by finding the vertex point and x or y-intercepts. LABEL

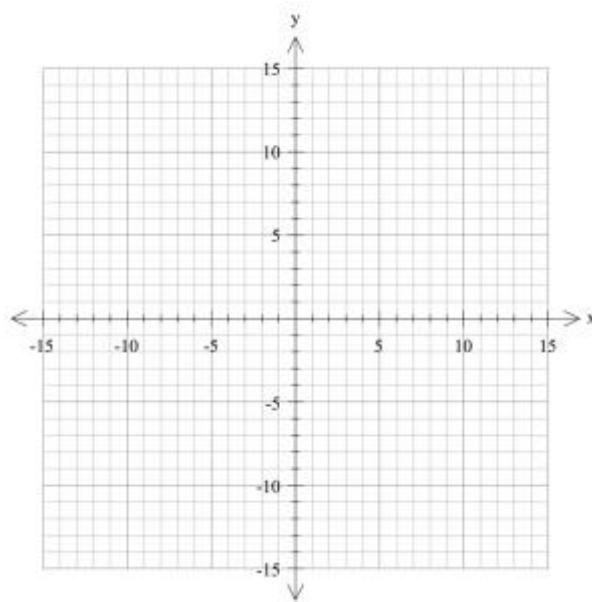

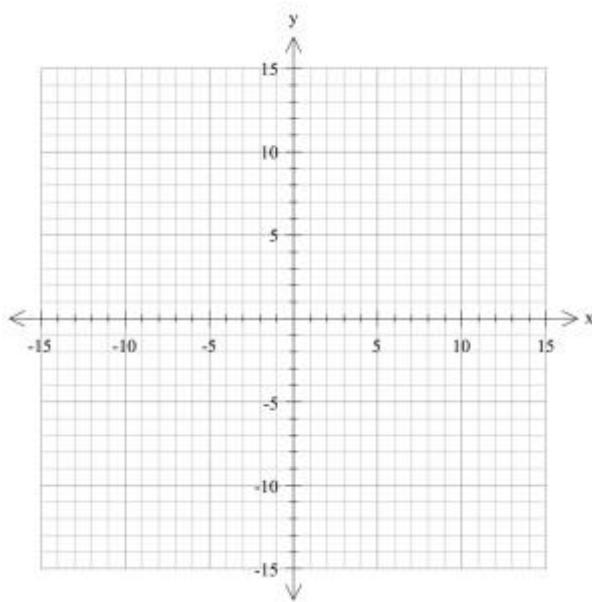

1) $y = x^2 + 2x - 8$

2) $y = x^2 - 36$

3) $y = -x^2 + 8x - 16$

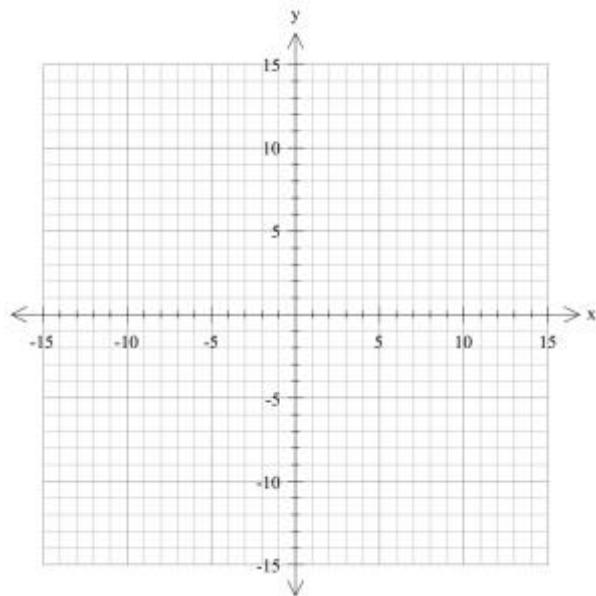

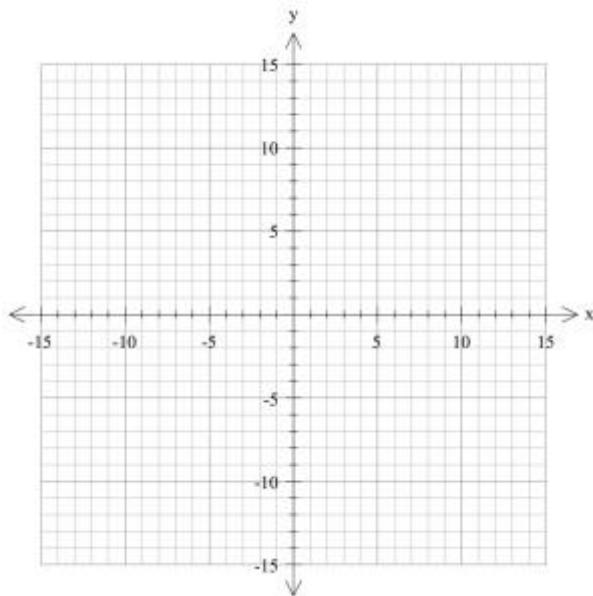

4) $y = 4x^2 - 17x - 15$

Section II. Graph each equation by finding the vertex point, the y-intercept and its reflection point. LABEL

5) $y = x^2 - 4x + 9$

6) $y = x^2 + 4x + 8$

7) $y = -2x^2 + 8x - 3$

8) $y = -3x^2 + 6x - 2$
